Ștefan Gordîn

- **Location:** Iași, Romania
- **Email:** gordinstefan@gmail.com
- **Phone:** +40742322735
- **LinkedIn:** stefangordin

Summary

- **Software Engineer**
- **7+ years of experience**
- **Ex-Amazon, Ex-Bolt**
- **Problem solver, C#/TypeScript enjoyer, impact-driven**

Experience

Software Engineer

Clipboard Health
Feb 2024 - Nov 2024 (10 months) - **Timekeeping and Payments**

- Designed and implemented scalable, well-tested, full-stack solutions for multiple web applications.
- Contributed to features such as shift geofencing, NFC scanning, invoicing, and payments.

Tech stack: Node.js, TypeScript, NestJS, Docker, MongoDB, Atlas, AWS, React, Ionic (Cordova, Capacitor), Flutter.

Software Engineer

Bolt
Feb 2022 - Nov 2023 (1 year 10 months) - **Bolt Food - Food Delivery**

Timing Team:

- Designed and implemented scalable solutions for precise ETAs using Machine Learning models.
- Optimizations added over seven figures in revenue by improving courier time utilization and reducing idle time.
- Enhanced customer satisfaction with predictable ETAs, faster deliveries, and fresher food.

Pricing Team:

- Developed customizable and modular pricing configurations, streamlining operational work.
- Led the development of granular fee configurations to increase profitability.

Tech stack: NodeJS, TypeScript, Docker, React, Redis, MySQL, AWS SNS/SQS, Redshift, Presto, TiDB.

Senior Software Engineer

Ness Digital Engineering
Nov 2020 - Feb 2022 (1 year 4 months) - **Transportation Intelligence Solutions**

- Worked in Scrum teams in an Agile environment.
- Designed, reviewed, and implemented new features in a multi-tenant SaaS product built using microservices.
- **Business areas:** Payments, tenant configuration, user configuration, journey tracking, and action tracing.

Tech stack: .NET Core, Docker, React, RabbitMQ, PostgreSQL, Atlassian stack.

Software Engineer

Amazon
Feb 2020 - Nov 2020 (10 months) - **Software Solutions for Static Media in Marketing Campaigns**

- Implemented image processing algorithms and server-side rendering for promotional media.
- Managed marketing campaigns and request flows.
- Deployed microservices in AWS using Lambda, StepFunctions, EC2, and S3.

Tech stack: NodeJS, Java, Ruby on Rails, Angular 2, Angular 1.

Software Engineer

Centric
Sep 2017 - Feb 2020 (2 years 6 months) - **HR Software**

- Developed full-stack features in a multi-tenant SaaS project.
- Worked with modular monolithic architecture, hexagonal architecture, DCI, ports, and adapters.
- **Business areas:** Pensions, reimbursements, employment, time compensation, leave, personal details, organizational details, audit logging.

Tech stack: .NET Framework, .NET Core, Angular 2+, SQL Server, Redis.

Teaching Assistant

"Alexandru Ioan Cuza" University, Iași
Feb 2022 - Jun 2023 (1 year 5 months)

- Taught Web Technologies to second-year Computer Science students.

Education

"Alexandru Ioan Cuza" University, Iași

Master's Degree, Software Systems Engineering
2017 - 2021

- Distributed Computing, Semantic Web, Web Development

Bachelor's Degree, Computer Science
2014 - 2017

- Data Structures, Algorithm Design, Object-Oriented Programming, Databases, Cryptography, Machine Learning, Information Security

Skills

- Product Development
- Web Development
- Scalability
- Software Design
- Software Systems Engineering
- Problem Solving
